

**PAD 3.0**  
swiss made

PAD 3.0 is the forceful further development of the successful PIXY Application Designer (PAD) concept. Along with the widened number of new Components PAD 3.0 offers complete applications like the PIXY Video Application as Drag and Drop component.

With the PIXY Application Translator (PAT), which belongs to the PAD Tool, a PAD project becomes multilingual without the need to change a single line of code.

For a facile and complete documentation of a PAD project, PAD comes along with the PIXY Documentation Processor (PDP), which documents all screens together with all the logics behind in a consistent and easy to read format.

Development Environment	Windows PC (XP Prof. or Windows 7) with PIXY PAD Client installed Build via Internet on a secure Server, incl. version mangement
Licenses	No development license, no runtime licence All PAD tools (PAT, PDP) are license free
